# SEO for Jobs - Short portrait

SEO for Jobs is the first service provider specialized in Google for Jobs on the German market. The software solution of the same name is used to place, analyse and optimise job advertisements on Google for Jobs. An intervention in the website of the customer is not necessary.

New technologies - like Google for Jobs - can turn entire industries upside down almost overnight. At the same time, these technologies are often complex and difficult to access.

SEO for Jobs has made it their goal to make Google for Jobs easily accessible to everyone. In over 15 years, Alexander Meirowski and Patrick Schmidt - the founders of SEO for Jobs - have gained a lot of experience in software development. All this know-how is now also in their latest software product SEO for Jobs.
